The problem is real, and it is measured

51%

of YouTube users say it is 'very important' for learning how to do things they haven't done before.

Pew Research Center, 2018

3.13%

completion rate for MITx / HarvardX online courses (2017-18).

Reich & Ruipérez-Valiente, Science, 2019

66%

of developers are frustrated by AI answers that are 'almost right, but not quite'; 46% distrust AI accuracy.

Stack Overflow Developer Survey, 2025

9 in 10

new internet users in India are likely to be Indian-language users.

KPMG & Google, 'Indian Languages', 2017

1.8 h/day

the average knowledge worker spends searching for and gathering information.

McKinsey Global Institute, 2012

Lost minutes add up to lost money

50	× 10	× 3 min	× 240	6,000 h
engineers	lookups / day	scrub & re-watch	work days	≈ $300,000 / year at $50 / hour

Illustrative model - our assumptions, for one 50-person team.

Time

Minutes per lookup, every day, for every learner. Most give up before the end (3% finish).

Wrong answers

A confident but invented AI quote means rework, bugs and wrong decisions.

Lost learners

Millions who think in Hindi / Hinglish are left out of English-only video.

Ask your video. Get the answer, with proof.

Demo lesson: Gemini lesson plan template · Google for Education

What does the Gemini draft include?

It drafts objectives, steps to follow, and ways to adapt the lesson for beginners and advanced learners.

✓ Verified from this video · 100%

▶ Jump to 00:21

"Gemini quickly generates a draft that includes objectives, steps to follow, and even ways to adapt the material for students who are new to the topic and advanced learners."

Explore from here → How does the coach share the template with educators?

1. Ask

Type or speak a question, in English, Hindi or Hinglish.

2. See the proof

The exact words from the video, with a 'Verified from this video' badge.

3. Jump there

One click plays the video at that exact second.

4. Honest edges

Not in the video? It says so, and can search the web, clearly labeled.

The difference is stark

	BEFORE	AFTER - CONTEXTBRIDGE
Find the exact moment	~3 min of scrubbing	**~6 s, one click**
Answers with invented quotes	Unverifiable	**0% (25-case eval)**
Correct timestamp	Guesswork	**100% (25-case eval)**
Languages	English only	**English · Hindi · Hinglish + voice**
50-person team, per year	6,000 h ≈ $300,000	**~400 h ≈ $20,000**

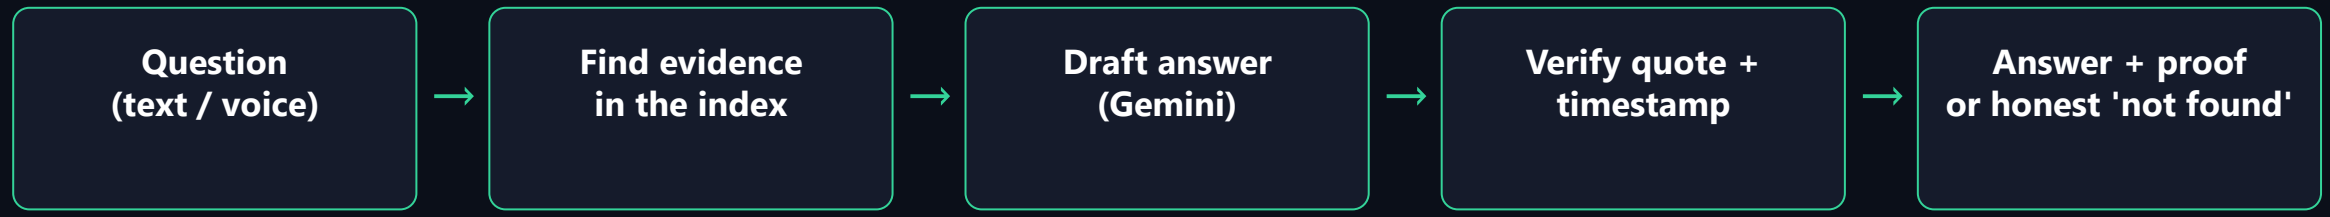

Measured: 25-case evaluation on the demo lesson. Before values and team cost: estimates (10 lookups/day, $50/h).

Simple, robust pipeline + a self-checking AI agent

1 · INGEST ONCE (data pipeline)

2 · EVERY QUESTION (AI orchestration: ≤ 2 model calls, 1 retry)

Separate web branch

Google Search grounding only when the video lacks the answer - always labeled.

Anti-fabrication gate

Quotes must appear in the transcript; timestamps must be inside the video.

Production-ready

Stateless FastAPI + Next.js on Google Cloud Run, Vertex AI, eval harness.

Team Naruto: enterprise engineering that ships

Mohit Singh - Team Leader

10+ years of enterprise engineering.
Reliable, secure, production systems.
mohitsinghgeek@gmail.com

Shanu Gupta - Frontend Designer

Designs the screens a learner uses:
the lesson, the proof, and the voice.

Live	25 / 25	0%	EN · HI
on Google Cloud Run	eval cases grounded	invented answers	voice in & out

Not a tutor. A compass - every answer anchored to your video, with proof.
